

Susan Rachtman, EDAC

Green Belt Lean Certified for Healthcare

President & Co-owner of *the Rachtman Group LLC*

Independent Medical Equipment Planner...

With more than 30 years of varied medical industry experience Susan brings an international focus to Medical Equipment Planning for hospital and clinic projects. She holds an Evidence-Based Design Accreditation and Certification (EDAC) through the Center for Health Design and is Green Belt Lean Certified for Healthcare.

Susan comes from a background of ‘hands on experience’ starting as a nurse working in both England and New Zealand.

She spent several years as a highly successful medical & surgical sales representative and product manager for a range of technical surgical products. Working in the operating room with surgeons and staff has given her a knowledge of hospital procedures and how to work most effectively with end users as well as vendors.

9209 Wood Creek Lane NW
Albuquerque, NM 87120

She started to build her experience in hospital design and workflow after forming her own company which was the importer and distributor of *Herman Miller for Healthcare*, New Zealand.

Running her own business gave her a strong respect for deadlines and the financial bottom line.

Since coming to America in 2008 (now a US Citizen), she has worked as an Equipment Planner on a broad range of projects, from major & government facilities to small community hospitals.

She has a strong focus on teamwork and communications with all stakeholders. Her attention to detail will help to keep your project on time and on budget.

Experience includes:

- Inpatient Medical Centers (Level 1 & 2 Trauma)
- Ambulatory Care Centers
- Critical Access / Micro- Hospitals
- Cancer Centers
- Outpatient Medical Facilities
- Dental Clinics

While Susan can adapt and work within all disciplines of a hospital environment ‘Surgical Services’ would be one of her specialty areas (including Endo, Post Anesthetic Care and Sterile Processing).

Services:

- Analysis of Existing Equipment
- Development and/or Validation of Equipment Specifications
- Budgeting
- Facilitation of User Group Meetings
- Architectural & Engineering Communications Support
- Equipment Validation
- Procurement Coordination & Support
- Installation & Activation Support
